

ENECON is Your Source for Repair and Maintenance Solutions

ENECON is your source for repair and maintenance solutions for almost every type of application including [machinery and equipment](#), [chemical protection](#), [concrete repair](#), and [corrosion resistance](#) plus so much more.

[Contact me](#) today so ENECON can solve your problem tomorrow!

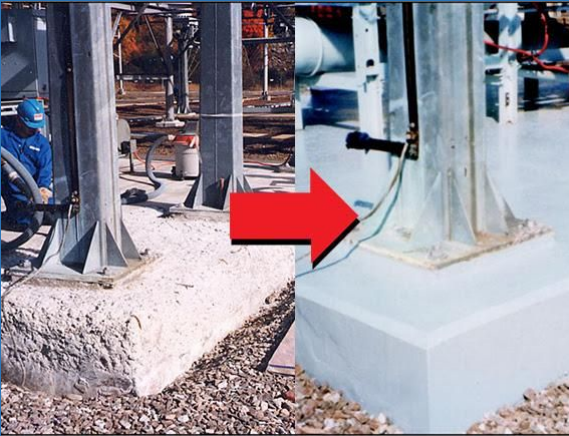

Machinery and Equipment

Repairs to materials such as metals, fiberglass, PVC, wood, ceramics, tile, wood, concrete, stone, brick, even glass. It can be used to repair damaged shafts, oversized bearing and bush housings, sloppy keyways, cracked or holed casings and blocks, stripped threads, scored hydraulic rams, etc.

Chemical Resistance

ENECON's **CHEMCLAD** Systems provide unrivaled performance in all types of chemical environments such as tanks, pumps, valves, as well as on concrete and other mineral substrates such as in secondary containment applications.

Concrete Repair

ENECON's **ENECRETE** High-Performance Polymer Composites provide the maintenance engineer with cost effective and commercially proven solutions to a wide variety of concrete problems on floors and walls.

Corrosion Resistance

ENESEAL CR is a 'surface tolerant' coating system that does not require abrasive blasting prior to application.
