

Urgent Expansion Joint Repair Job

The production and service team of Townson, recently completed a major expansion joint job at a cement plant in Saraburi. The challenge was to replace 5 large fabric expansion joints within a period of 7 days. To make this possible, Townson engineers design new steel frames to make new expansion joint assembly.

This simplified the job significantly as installation on steel ducts was a simple lifting and flange bolting job. Conventional means of changing the expansion joint at site would have taken almost 1 month with a large team working at site. Customers were very satisfied that this was avoided - especially during these COVID times.

Townson Enterprises is a subsidiary company of the PSS group. Originally from the UK, Townson is now based out of Thailand with a manufacturing base in Rayong.

Townson Enterprises Company limited
The Perfect Seal and Services Company limited.
